Goat anti-Rabbit IgG (H&L), AQuora® 800 min X Mouse, Human, Bovine, Horse *Min X Mouse, Human, Bovine, Horse*

AQuora® 800-labeled Goat anti-Rabbit IgG (H&L) adsorbed to mouse, human, bovine and horse IgG is useful in the fluorescent-based immunodetection applications. The adsorption profile (mouse, human, bovine, horse) makes this product suitable for multiplexing in immunofluorescent applications, fluorescent immunostaining of mouse and human tissues, and applications using either bovine or horse serum in medias or buffers. The Goat anti-Rabbit antibody has been covalently labeled with near IR fluorochrome utilizing our exclusive SuperHydrophilic technology, resulting in improved solubility, limited non-specific binding, and improved signal-to-noise ratios compared to the classical near IR dye labeled antibodies (Alexa Fluor® 790, DyLight® 800, DyLight® 800 4x PEG, IRDye® 800CW), while maintaining identical photophysical properties. This AQuora® 800-labeled Goat anti-Rabbit IgG (H&L) is useful in fluorescent western blots and flow cytometry.

Alexa Fluor® and DyLight® are registered trademarks of Thermo Fisher Scientific. IRDye® is a registered trademark of Licor®.
