Goat anti-Human IgG (H&L), AQuora® 750

AQuora® 750-labeled Goat anti-Human IgG (H&L) is useful in fluorescent-based immunodetection applications. The Goat anti-Human IgG (H&L) antibody has been covalently labeled with near IR fluorochrome utilizing our exclusive SuperHydrophilic technology, resulting in improved solubility, limited non-specific binding, and improved signal-to-noise ratios compared to the classical near IR dye labeled antibodies (Alexa Fluor® 750, Cy7, DyLight® 755, and DyLight® 755 4x PEG), while maintaining identical photophysical properties.

Alexa Fluor® and DyLight® are registered trademarks of Thermo Fisher Scientific
