Goat anti-Human IgA, α chain specific, AQuora® 800

AQuora® 800-labeled Goat anti-Human IgA, α chain specific is useful in the fluorescent-based immunodetection applications. The Goat anti-Human IgA, α chain specific antibody has been covalently labeled with near IR fluorochrome utilizing our exclusive SuperHydrophilic technology, resulting in improved solubility, limited non-specific binding, and improved signal-to-noise ratios compared to the classical near IR dye labeled antibodies (Alexa Fluor® 790, DyLight® 800, DyLight® 800 4x PEG, IRDye® 800CW), while maintaining identical photophysical properties.

Alexa Fluor® and DyLight® are registered trademarks of Thermo Fisher Scientific. IRDye® is a registered trademark of Licor®.
