**Goat anti-Chicken IgY (H&L), AQuora® TX595 min X Mouse, Rabbit, Human, Bovine, Horse**  
*Min X Mouse, Rabbit, Human, Bovine, Horse*

AQuora® TX595-labeled Goat anti-Chicken IgY (H&L) adsorbed to mouse, rabbit, human, bovine and horse IgGs is suitable for use in immunodetection applications. The adsorption profile (murine, rabbit, human, bovine, horse) makes this product suitable for multiplexing in immunofluorescent applications, fluorescent immunostaining of murine and human tissues, and applications using either bovine or horse serum in medias or buffers. The Goat anti-Chicken antibody has been covalently labeled with sulforhodamine 101 utilizing our exclusive SuperHydrophilic technology, designed to improve solubility and reduce non-specific binding, while maintaining photophysical properties of spectrally comparable dyes (Texas Red®).
