Streptavidin, AQuora® Fluorescein

AQuora® Fluorescein-labeled Streptavidin is useful in the fluorescence-based detection of biotinylated proteins. Streptavidin has been covalently labeled with fluorescein utilizing our exclusive SuperHydrophilic technology, designed to improve solubility and reduce non-specific binding, while maintaining photophysical properties of spectrally comparable dyes (FITC). Fluorescein-labeled streptavidin is useful in the classic range of applications including immunofluorescence, fluorescent western blots, and flow cytometry. For best results, use this product in conjunction with our SuperHydrophilic line of biotinylated antibodies.
